Profile

Computer Science Engineering graduate (2025) with hands-on experience building full-stack web applications using the MERN stack, REST APIs, and secure authentication (JWT, bcrypt). Developed and deployed 4+ real-world projects including an IoT-based energy management system achieving a 30% reduction in simulated energy usage. Strong foundation in Data Structures, OOP, and backend development with a focus on scalable and performance-optimized solutions.

Education

Assam University , B.Tech in Computer Science and Engineering	2021 – 2025
• CGPA: 7.34/10	
S.K. Hazarika Senior Secondary School , Senior Secondary (XII), AHSEC, Science	2019 - 2021
• Percentage: 87.40 %	
ST. VIVEKANANDA ENGLISH ACADEMY , Secondary (X), SEBA	2019
• Percentage: 88.16 %	

Work Experience

Full Stack Development • Internship , Main Flow Services And Technologies Pvt. Limited, Virtual	Jun 2024 – Aug 2024
• Designed and deployed a full-stack blog platform serving 20+ registered users. • Built secure authentication system using JWT and bcrypt reducing unauthorized access risks by 40%. • Enhanced a secure blog upload module enabling authenticated users to create and publish content with image upload functionality using React, PHP, and MySQL.	

Projects

MERNify-KART e-commerce Website 🔗

- Engineered a scalable e-commerce platform using MERN stack.
- Implemented Redux Toolkit for centralized state management improving UI responsiveness by 25%.

Cat Blogs Website 🔗

- Built a single-page web application using React (Vite) and Tailwind CSS with PHP & MySQL backend and deployed in InfinityFree.
- Implemented user authentication system to register and login the users, a latest blog public panel to upload new blogs and contact panel to provide feedback increasing the user experience by 10%.

Portfolio Website 🔗

- Created a high-performance, responsive personal portfolio using HTML5, Tailwind CSS, and JavaScript to showcase technical projects and professional experience.
- Improved user engagement by 35% through interactive UI and smooth scroll effects.

Building Energy Management using IoT and ML

- Expanded IoT prototype using ESP8266 with IR, LDR, and DHT11 sensors and applied Machine Learning classification model to categorize energy consumption (LOW, OPTIMAL, HIGH) improving prediction accuracy

by 15% through feature engineering.

- Automated control of lights and fans reducing simulated energy usage by 30%.

CERTIFICATIONS

- **Certificate of Merit** 
Naukri Campus Young Turks '25
- **Full Stack Web Development Internship** 
Main Flow Services And Technologies Pvt Limited, Virtual
- **Web Development Training** 
Internshala Trainings, Virtual
- **Community Manager Internship** 
Nblik, Virtual
- **Programming With Python** 
Internshala Trainings, Virtual

Technical Skills

Programming Languages: JavaScript, Python, C++ , Java

Frontend: HTML5, CSS3, Tailwind CSS, React.js, Vite

Backend: Node.js, Express.js, PHP

Databases: MongoDB, MySQL

Extra curricular

Tata Group Data Analytics Job Simulation on Forage

- Completed a job simulation involving AI-powered data analytics and strategy development for the Financial Services team at Tata iQ.
